

AWS Cost Analysis

Q1 2024 (Jan–Mar) AWS spend across 4 services and 5 linked accounts, driven mostly by Compute and Storage usage.

\$299.6K total cost, Q1 2024

60% of spend comes from EC2

+55.2% cost growth, Jan → Mar

FINDING
Account_1 spends about 46% less than the average of the other four accounts — despite running the same service mix. A useful benchmark for cost-efficient usage.

Cost by Linked Account

Service & Usage Breakdown

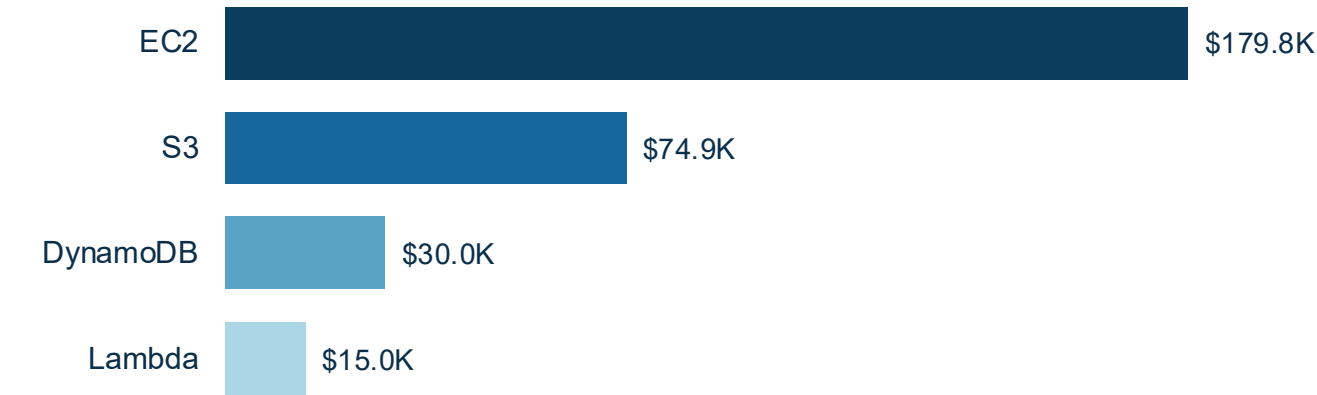

Where the Q1 2024 AWS spend actually went — by service and by usage type.

60% of spend is EC2 — the top service

52% of spend is Compute — the top usage type

EC2 leads both breakdowns — it's the largest individual service and its usage is almost entirely Compute, making it the single biggest lever for cost optimization.
